## PROFESSIONAL EXPERIENCE

---

**Cloud Support Associate, Accenture 03/2023 – 09/2023**  
Gurugram, India

- Successfully analyzed user requirements and developed client-satisfying applications, exemplified by my work on projects.
- I have experience working with Azure environment and utilizing Service-now.
- Have knowledge and experience with Amazon Web Services.
- Experience in Application Quality and Analysis and Quality Management.
- Monitoring cloud services and proactively identifying issues before they become customer-impacting.
- Identifying and resolving technical issues reported by customers related to cloud services such as computing, storage, networking, and database.
- Provide guidance and training to customers on best practices for using cloud services efficiently and securely.
- Develop and use scripts or automation tools to streamline repetitive tasks and improve efficiency.
- Keeping up-to-date with the latest cloud technologies and services to ensure optimal support for customers.

**Operations Executive, BYJU'S 10/2021 – 04/2022**  
Bangalore, India

- Familiarity with relevant software, such as Excel or enterprise resource planning (ERP) software.
- Experience with logistics and supply chain management.
- Experience with data analysis and process improvement.
- When technical issues arise, you will need to troubleshoot and resolve them quickly and efficiently. This may involve working with IT teams or external vendors to resolve the issue.
- I need to ensure that your organization's IT infrastructure is maintained and updated regularly. This may include managing servers, databases, networks, and other technical systems.

## PROJECTS

---

### Portfolio Website

- A portfolio website is a collection of my work and projects, showcasing my skills and accomplishments.
- The website can be created using a variety of different tools and technologies, such as HTML, CSS, and JavaScript.
- The website also includes a contact page with my contact information and a form for visitors to get in touch with me.
- Link: <https://portfolio-manas-dey.netlify.app/>

### COVID-19 Stats Website

- Developed a web-based application using HTML, CSS, and JavaScript to track and visualize COVID-19 statistics.
- Implemented interactive charts and graphs to allow users to easily compare statistics across different countries and regions.
- Link: <https://livecovidstats.000webhostapp.com/>

### Book Management

- Implement a student library system using opps where student can borrow a book from thr list of books. create a separate library and student class. This program is menu driven, you are face to choose methods and attributes of your choice to implement this function.
